Protects Against  
Hazardous Dust & Fumes

Unique 4-way  
Extraction System

Integrated  
Work Lamp

**The nail station & filter system**

# Nail Station & Filter System

## Nail Technicians and Clients Can Develop...

- Eye Irritation
- Dermatitis & Acne
- Occupational Asthma
- Headaches
- Nosebleeds
- Sore Throat
- Damage to respiratory tract & lungs

## Nails - The Hidden Dangers

Dust generated whilst filing nails and the fumes given off by some beauty products can be hazardous if not controlled. Dust and fumes in beauty salons can cause serious long term medical conditions such as occupational asthma and therefore employers risk expensive claims for compensation from staff. International Health & Safety regulations (e.g. COSHH) state that an employer shall not expose staff to substances that are hazardous to health.

## Purex - The Solution

The unique Purex 4-way nail station & filter system:

- Stops clients and technicians breathing harmful dust and fumes.
- Ensures that salon owners comply with Health & Safety Laws.
- Maintains a dust and smell free salon giving you an advantage over competitors.
- Helps to reduce sick leave and creates a better salon environment.
- Operates quietly and efficiently and has excellent filter life to ensure low running costs.

## • • • Nail Station with Integrated 4-Way Extraction System • • •

Portable units and choice of colours and finishes available

Flexible extraction arm with integrated work light removes all chemical fumes rising from nail products.

Extraction cowl removes all fumes from bottles and dishes on the work surface.

Downdraught grille pulls all nail dust down into the filter system.

Handy vented drawer stops smells from products in storage.
